Date of Manufacture:

FIRST AID

For advice call the National Poisons Centre 0800 POISON (0800 764 766) (24 hours) or a doctor. If medical advice is needed have product container or label to hand.

IF SWALLOWED: Do NOT induce vomiting. Rinse mouth. Call the Poisons Centre or doctor if you feel unwell.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If irritation persists, get medical advice/attention.

IF ON SKIN OR HAIR: Remove contaminated clothing and flush with water. If skin irritation occurs, get medical advice/attention. Wash contaminated clothing before reuse.

IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. Call the Poisons Centre or a doctor if you feel unwell. Apply artificial respiration if not breathing.

EMERGENCY RESPONSE

In a transport emergency call 111.
For specialist advice in a chemical emergency call 0800 CHEMCALL (0800 243 622).

SPILLAGE

Exclude non-essential people from the area. Wear protective clothing and prevent chemical from entering waterways. Absorb liquid spills with inert material such as attapulgite, soil, etc., and place in a waste container. Wash area with water and absorb with further inert material. Dispose of safely at an approved landfill.

SAFETY DATA SHEET

Additional information is provided in the safety data sheet. Phone 09 273 3456 or visit www.agpro.co.nz for a copy.

DIRECTIONS FOR USE

AGPRO Anti-Foam 1410 works effectively in very low concentrations. 1 to 100 parts of active silicone per million parts water are sufficient to eliminate most foams. 20-50mls of **AGPRO Anti-Foam 1410** per 100L of liquid is generally sufficient to eliminate or suppress the foam in most situations. Start with the higher rate and then reduce the addition rate to achieve the desired level of foam control.

MIXING

For best results pre-dilute the **AGPRO Anti-Foam 1410** with 5 parts water and add to the liquid. This helps dispersion. Pre-diluted material should be used immediately. If the system can provide adequate dispersion the **AGPRO Anti-Foam 1410** may be added directly without pre-dilution. It is best to add to agitated liquids before foam starts to appear, however it may be added after foaming occurs to break the foam.

CLEANING AND DECONTAMINATION

After using spray equipment, flush all equipment and lines with clean water.

CONDITIONS OF SALE

As the use of this product is beyond the control of AGPRO NZ Ltd, no warranty expressed or implied, beyond that covered under the Fair Trading Act is given by AGPRO NZ Ltd regarding its suitability, fitness, or efficacy for any purpose for which it is used by the user, whether in accordance with the directions or not. AGPRO NZ Ltd accepts no responsibility for any consequence whatsoever resulting from the use of this product.
